

SIP Trunks

Simplify Your Voice Services

The XCast SIP Trunking services provide a robust and efficient way to connect your on-premise or hosted PBX to the world. With high-quality voice services and flexible pricing, we help businesses of all sizes streamline their communications while reducing costs.

All SIP Trunk Plans Include the Following Features

Unlimited Calls to On-net Customers

Automatic Fail-over to IP or Phone Number Provided

Integration with Existing PBX Equipment and IADs (Internet Access Devices)

Local Phone Numbers for More than 10,000 US Cities and 60+ Countries

Toll-free Phone Numbers for US and International

911 Coverage Across the US and Canada

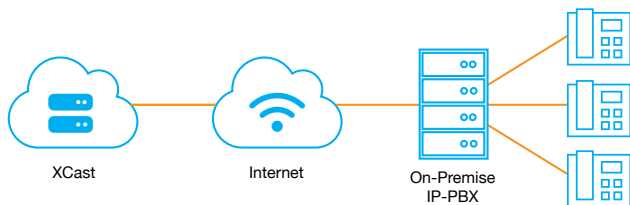

Unlimited Free Inbound Calls and Free Installation

Compliant with Both Kari's Law and the RAY BAUM Act

Address SIP Trunking

Address SIP Trunks can be configured to failover incoming calls to a secondary IP address and then a phone number if both Primary and Secondary IP addresses fail.

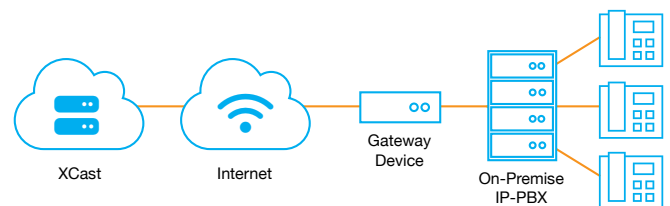

Direct Routing SIP Trunks for Microsoft Teams

Place and receive calls using Microsoft Teams, routed through your address Trunk account, utilizing the service plans and rates that are active on that account.

Device SIP Trunking

Manage All Features from an Online VoIP Control Panel (VCP)

Device SIP Trunks can be configured to fail-over incoming calls to a phone number. A gateway device is used for connection to non IP/SIP Enabled PBX systems. The gateway will convert the SIP Trunk to analog for connection to the phone system.
