# CIP-720-CX

## Reliable Call Controller for Small and Medium Hospitality Properties

The ClearlyIP CIP-720-CX Call Controller delivers dependable, cost-effective telephony designed specifically for small hotels, motels, and small resorts. Built on the trusted ComXchange platform, it combines stability, flexibility, and compact design to meet the needs of properties with essential yet critical communications requirements.

With support for up to 100 extensions and 30 concurrent calls, the CIP-720-CX ensures that staff and guests stay connected without bottlenecks. Its small form factor chassis saves valuable space in server rooms, while a solid-state 128 GB SSD and 4 GB of memory provide consistent, reliable performance.

Integration is seamless thanks to modern, IP-based connectivity, allowing reliable communication with today's property management systems (PMS) and call accounting systems (CAS) over the network. The CIP-720-CX makes it an ideal choice for hospitality environments with minimal IT infrastructure or those looking for a streamlined, maintenance-friendly telephony solution.

The CIP-720-CX is more than just a call controller; it's a purpose-built solution that delivers the right blend of performance, integration, and space efficiency for smaller hospitality properties that demand reliability without complexity.

### KEY HIGHLIGHTS

- » Small form factor chassis saves space in server rooms.
- » Designed for small to medium hospitality properties.
- » Dual Gigabit Network Ports.
- » Reliable solid-state storage for dependable performance.

### IDEAL APPLICATIONS

- » Boutique hotels, motels, and small resorts
- » Small campuses needing unified call control
- » Hospitality properties with minimal IT infrastructure
